Comment. In connection with the reorganization of Soviet transit traffic through Poland, the GDR Railroad Administration offered to lend total of 80 locomotives to the Polish Railroad Administration. It is believed that the negotiations mentioned were connected with this transaction. Comment. Ruednitz which is northeast of Berlin, Kerkwitz which is located scuthwest of Guben, and Ducherow which is located northwest of Pasewalk, had previously been used for the parking of reserve column locomotives. Comment. Information on the introduction of the school dispatcher service after the Soviet pattern, was transmitted previously. dispersal) Comment. The so-called "Richtpunktverfahren" concerns the marshaling and hartngaup of trains at shunting stations and marshaling yards. It has been designed to simplify these operations. One of the main features of the new system is a baic change in the previous procedure of labeling trains with waybills which fix the route of the cars from the place of departure to destination.
